

Vertex LargeLake™ System

Features And Benefits

Powerful: (4) Vertex super-duty 230V single phase HighFlow™ compressors

Impressive Airflow: 22 CFM at open flow with maximum pressure of 25 PSI

Energy Efficient: HighFlow™ compressors reduce electric bills by 10% over previous models

Vertex SafeStart™: This technology allows start-up under full back pressure without compressor damage

Versatility: System operates Shallow Water and Standard CoActive, XL4, XL5 and XL8 AirStations™

Aluminum Construction: Heavy duty, reinforced and welded aluminum cabinet

Powdercoated Finish: Long lasting powdercoated finish and stainless steel hardware for durability

Improved Cooling and Noise Reduction: Cabinet design maximizes directional airflow and noise reduction

Redundant Cooling System: Back-up fans protect compressors from fan failure related heat destruction

Warranty: Two years on cabinet and components, five years on all AirStations™ and fifteen years on BottomLine™ tubing

The new QA4 LargeLake™ System by Vertex Water Features represents our most advanced technology providing greater cost savings by combining multiple compressor systems into a single cabinet while lowering maintenance expenses and electrical costs.

Whether you have a large shallow lake, or a deep reservoir, Vertex can offer you the most economical, versatile and effective aeration design.
